Prestige Range

Dear Angus Breeder,

Welcome to this edition of the Progressive Genetics Prestige Angus Catalogue.

The sires featured within these pages represent an elite selection of Angus genetics, chosen to meet the highest standards of performance, functionality and breed character. Our extensive portfolio offers breeders an exceptional depth of choice, combining proven bloodlines with the latest genetic advancements while maintaining the quality, consistency and reliability expected from the NCBC Angus programme.

NCBC operates Ireland’s leading cattle breeding programme on behalf of Munster Bovine and Progressive Genetics. The scale of this programme, together with extensive performance recording and genetic evaluation, provides us with an unrivalled insight into the sires that consistently deliver for farmers in Ireland and internationally.

The strength of the NCBC Angus programme lies in its commitment to continuous genetic improvement. By combining proven Irish bloodlines with leading international genetics, we continue to develop a diverse portfolio of sires that reflects the evolving requirements of both pedigree and commercial breeders.

We recognise the importance of selecting genetics that complement the individual breeding objectives of each herd. Our experienced team are always available to provide expert breeding advice, helping you identify the most suitable sires to achieve your breeding goals.

We trust this catalogue will prove a valuable resource throughout the breeding season.

Thank you for your continued support of Progressive Genetics and confidence in the NCBC Angus programme. We wish you every success in the upcoming breeding season.
